

Innovative Solutions in Home Technology

smartwiring

With audio/video, multimedia, communications and automation systems increasingly becoming standard features in residences and businesses, the need to manage all of these converging technologies is indeed the surge in cabling structure and organization.

Our smart wiring solutions are the distribution and administration point for whole-house audio and video entertainment, computer networking, security, internet access, home office and more!

Homerun Technology's Design Consultants will work with you and your family to professionally design a solution that will meet your lifestyle today and in the future. Smart wiring unleashes the full potential of:

- ✧ Audio/Video Distribution
- ✧ Shared Broadband Internet Access
- ✧ Security and Baby Camera Monitoring
- ✧ Multi-Player Gaming
- ✧ File, Application and Printer Sharing
- ✧ Satellite Television
- ✧ Phone and Fax

Homerun Technology offers customizable, professional solutions for condominiums and homes of all sizes. Our packages start at four data port locations (phone, data, and cable/satellite) and are customizable to integrate with other home systems. Homerun Technology is an authorized and certified GE SMART dealer, allowing us to bring you quality home products from an industry leader. We invite you to contact Homerun Technology today to learn more about the GE SMART 400, 800 or 1600 Connection Center Series and other exciting GE SMART products.
